

The easy way to deploy, operate,
and optimize application containers

nirmata
innovate faster

Hybrid Cloud Application Management

Nirmata makes it easy for enterprise DevOps teams to seamlessly deploy and manage applications across vCloud Air and their private cloud.

- Hassle-free SaaS solution
- Supports leading cloud providers: Amazon Web Services, VMWare vCloud Air, VMWare vSphere, Cisco Intercloud Services and OpenStack.
- Deploys complex applications to multiple environments in minutes.
- Fully automates the lifecycle management of application containers with a rich policy framework.
- Designed for microservices, with built-in service registration and discovery, load-balancing, gateways, and routing.
- Selected by Gartner as a “Cool Vendor in Web-Scale Platforms.”

Win a GoPro
